

IT Job Fair (continued)

Other Ocean Interactive

This video game development studio is located in Charlottetown, and opened its second studio in St. John's Newfoundland in December. The company is celebrating its Atlantic Canadian roots with the release of a regionally inspired video game called *Puffins: Island Adventure*. The game will be released in late May.

The company employs **Artists, Programmers, Game Designers,** and **Producers**. "We are always looking for qualified people," says Christine.

Christine Bourque, Production Assistant with Other Ocean Interactive Inc., and Gavin Leslie, Quality Assurance (QA) with Skulpin QA

Sculpin QA

"This is the best job I've ever had," says Gavin. "It's different every day, and the people I work with make it fun."

Sculpin QA hires **Video Game Quality Assurance Testers**. Testers find bugs in video games and document them so that the game's programming team can correct the bugs. This position requires individuals with a passion for video games and the willingness to guide a project from early development to final product. The ability to use MS Office, MS Project, and basic programming knowledge is an asset.

PEI Provincial Treasury

The **Provincial Treasury** has about 400 employees, and almost half of them work in the **IT Shared Services Division**. This division provides IT support for the healthcare and education systems and for provincial government departments and agencies.

"We do on-going recruiting for various IT positions," says Bobby. "Currently, there are seven to eight job openings for positions including **IT Consultants, Report Writers** and **Programmer Analysts**. We also have ongoing needs for **Help Desk** and **End User Support Analysts**."

Bobby Kenny, Manager of Human Resources and Cathy McKeigan, IT Consultant

Timeless Medical Systems

Timeless Medical Systems develops advanced technology, software applications, hardware and IT systems for the healthcare industry.

They are looking to hire **Senior, Intermediate and Junior Software Engineers,** and a **Software Quality Assurance Tester**.

Depending on the job level, qualifications include a university degree in Computer Science or Electrical Engineering, with programming and project management experience. Proficiency in web technologies such as **PHP, Javascript, MySQL,** and the ability to quickly learn new programming languages is also required.

Lincoln Maskey, Programmer

ScreenScape Network

This company develops an Internet-based service and community that offers a smarter, simpler and more cost-effective way to use dynamic screens. These screens are used in restaurants, theatres, medical centres, hotels, and anywhere with a lobby, lounge or waiting room.

Mark, a former UPEI professor, started the company in Charlottetown in 2007. There are now 14 people working there, and they plan to hire five more in the next year. They also have a sales office in Ontario.

They are looking to hire a **Java/AS3 Developer, Customer Service Representative, Chief Software Architect, ActionScript Developer, Customer Support Manager, System Administrator,** and **Database Administrator**.
